DELAWARE SAND & GRAVEL CO., INC.

Location: 229 Grantham Lane

New Castle, Delaware, 19720

Owner: Joseph Dellaversano, 229 Grantham Lane, New Castle, Del., 19720

Telephone: 328-3491 322-1155 329-6411

Waste: Oil, Solvents, Menthyl Chlorid, Watered down acid, Gylocals.

5 loads a week, about 30 drums a load.

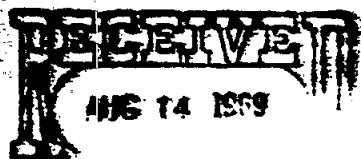

Operation consists of drums (55 gal.) being dumped in hole by truck after tops being removed. Liquid drains to bottom and is absorbed into sand banks. Drums are then dozed over and covered on top. Each hole we dig will give us about one years working area.

150 Per wk

600 Per Month

7200 Per year

319,600 - gallons per year

MR HANNAH

August 27, 1968

Mr. Joseph Bellavances, President  
Bellavance Sand and Gravel Company  
New Castle, Delaware 19720

Dear Mr. Bellavances:

It has come to my attention that your company's applications for more comprehensive Certificates of Approval for the operation of a landfill have been received. Because of the necessary study by the Water Pollution, Air Pollution, and Water Resources Divisions, the Commission was not able to take action at its August meeting. The applications are being processed, however, and decisions should be made at the meeting on September 13, 1968.

Because of your misunderstanding as to the validity of your present Certificate of Approval and the necessity of obtaining additional permits from other State agencies, I feel I should stress the following points:

Your operation is subject to the conditions of the Water and Air Resources Commission's Certificate of Approval ARC 68/37 until a new permit is issued by the Commission or until you receive notification in writing that another State agency is responsible for the various aspects of solid waste disposal heretofore controlled by the Commission. This means that until the Commission acts on the pending application, your operation is permitted to handle only those materials specified in your present Certificate of Approval. These are noted by Mr. Vincent Bellavances in his letter of August 9, 1968, to be ground cork, fibre scrap, cardboard, and paper.

I hope this clears up any questions you had concerning your permit. If I can be of further assistance, please do not hesitate to contact me.

Very truly yours,

J. Lynn Hopkins, Chief  
Field Services Section  
Air Pollution Control Division
